
another hidden dropdown issue

Posted by dmccreary - 2010/11/28 14:24

will gladly prepay 50 USD (or more) instantly via paypal for help as this is a commercial project. See <http://www.matchrace.com/summary.html> (test site)

When in breadcrumb position, submenu hidden behind module below (and if nothing on page problem is the same. If i move it to right column, in Firefox submenu will show to the left of the column, just fine. But hidden in IE, Chrome (have not tested others). Would prefer to have in breadcrumb position as shown at present. on skype as dmccreary of gloucester virginia. have tried a few of the CSS fixes listed here to no avail. if you provide me a paypal email i'll prepay. have more money than time :)

Hello,

Try to add the following CSS rule, it should help:

```
body #breadcrumbs
{
  overflow: visible;
}
```

You can add it to "CSS Styles" parameter in module settings or to site template CSS file.

Regards,
ARI Soft
