
Yep another color question!

Posted by greenfireproductions - 2010/12/01 20:27

First off I'd like to apologize for another color question, I went through like 5 of the other posts and tried to do what you told them and just couldn't get anything to happen, I'm using the menu here

www.wohat.com

it's under the advertiser videos on the left side. I would like the BG to match the color of that grey box but whenever I copy and paste any of the CSS code you suggest to others nothing happens. I tried to fix this issue on my own but just can't seem to figure it out. any help would be greatly appreciated.

Hello,

Use the following CSS rule:

```
.moduletable #ariyui93.yui-skin-sam .yuimenu .bd
{
  background-color: #616161;
}
```

Regards,
ARI Soft

one more question please I was searching the forum again, what is the code to change the font color to white? I added a code to get rid of the border, I figured that out on my own lol. Thanks again.

Use the next CSS rule:

```
.moduletable #ariyui93.yui-skin-sam ul li a.yuimenuitemlabel
{
  color: #FFF;
}
```

Regards,

ARI Soft
