
IE problem

Posted by crippletoe - 2010/12/31 19:14

Hello,
i am using ARI YUI menu on my site and for some reason, on IE alone, my menu's main level lost its functionality.
what i mean is, when the user hovers over the links you can see the cursor changes to a pointer to indicate a link but
when you click, nothing happens.
you can see an example here: http://kaplanoland.com/index.php?option=com_content&view=article&id=3&Itemid=3

there are 3 buttons on the right of the page: about, contact and projects. these are the problematic ones.

can you perhpas see what is the problem?

thanks.

Hello,

Try to use the following CSS rule:

```
body div#menu1 ul li.yuimenubaritem a
{
  *position: static !important;
  *display: block !important;
}
```

Regards,
ARI Soft
