
Padding problem with Opera

Posted by malin - 2011/01/13 15:02

Hello,

I have a padding problem with Opera. For all other browsers the menu looks fine, but in Opera the menu is missing 5px top padding.

Is there someway I can change css so that it looks the same in all browsers?

The site is under development, but I can provide the url in an email.

Thank you so much!

Malin

Try the following CSS rule:

```
.ext-opera #nav_main .moduletable
{
  padding-top: 4px;
}
```
