
Font Weight states?

Posted by eddiemalar - 2011/01/17 05:10

hello ... I need to change the menu states ...

I need to have the normal font in the usual menu, and when putting the mouse over the menu item must be bold ... but the parameters of the module doesn't allow me, generates a script that loads when you load the web and I can't modify these parameters, or through the module settings, or through settings in the template css ..

Any ideas how to solve this ...?

Thanks

Hello,

Try to add the following code into "CSS Styles" parameter in module settings:

```
UL#{ $id } A:hover,  
UL#{ $id } A:focus,  
UL#{ $id } A.ux-menu-link-hover  
{  
    font-weight: bold !important;  
}
```

Hi,

I've got the same problem, except that i need to get the submenu in bold. So, i used your code like this :

```
UL#{ $id } A,  
UL#{ $id } A:hover,  
UL#{ $id } A:focus,  
UL#{ $id } A.ux-menu-link-hover  
{  
    font-weight: bold !important;  
}
```

Result: it did not work.

By the way, i think i tried everything to even get a specific item in bold and nothing worked. :(

Any other idea about it?

thanks

JP

Hello,

Could you provide link where we can see the menu on your site?

Use the following CSS rules:

```
#menu .ux-menu-container UL.ux-menu ul.ux-menu-sub a,  
#menu .ux-menu-container UL.ux-menu ul.ux-menu-sub a:hover,  
#menu .ux-menu-container UL.ux-menu ul.ux-menu-sub a:focus,  
#menu .ux-menu-container UL.ux-menu ul.ux-menu-sub a.ux-menu-link-hover  
{  
  font-weight: bold !important;  
}
```
