
Submenu items stop at the same level of the parent

Posted by ZineR - 2011/01/18 20:57

Hi all,
i have a problem with my ari ext menu. I have a multi level menu and the subitems after the parent level are hidden, so i miss some of the contents of its submenu. What is wrong with it?
Its like this

```
p1
p2----p2subItem1
p3----p2subitem2
p4----p2subitem3
-----p2(SUBITEM4)
-----p2(SUBITEM5)
```

SUBITEM 4 and 5 missing.

Thanks in advance for your reply.

Hello,

Provide link to page where we can see this problem.

Regards,
ARI Soft

thanks for your immediate reply!!
heres the link

http://46.4.233.227/~remontgr/index.php?option=com_content&view=article&id=19&Itemid=3

Its the second Item of the vertical menu on the middle left

Add the following CSS rules to "CSS Styles" parameter in module settings:

```
#jv-col1,  
#jv-col1 div.moduletable,  
div#jv-colwrap1-inner,  
div#jv-colwrap1,  
div#jv-mainbody-inner,  
div#jv-mainframe-inner  
{  
    overflow: visible;  
}
```

DAMN you are good!! Thanks a lot!!

..but is there any way for the subitems to extend the length of the site?
i added some subitems now and it stops at the end of the page..

also there is a space between the two levels. It was for a bullet but i deleted the jpg. Is there any way to get the items together?

Use the next CSS rule:

```
UL.ux-menu LI  
{  
    padding-left: 0;  
    background-image: none;  
}
```

Hi again,

I have another problem now. When i use Google Chrome in the upper menou, when i go to the second level, the items are hidden from the menu, which is down, but this doesnt happen all the times.

The link for the site is :

http://46.4.233.227/~remontgr/index.php?option=com_content&view=article&id=1&Itemid=3

thanks in advance!

Hello,

Try to set "z-Index" parameter to "10000" for top menu and to "9000" for bottom menu in module settings.
