## drop down menu not working

Posted by hohajl - 2011/01/21 01:47

---

Hi, I installed the module, and enabled it. I read other discussions and added some css codes to my template css. Nothing has worked. I am using siteground template.

I need drop down menu from the topmenu of "our services" on this link: [huacommunications.com](http://huacommunications.com)

Waiting for your reply. thanks a lot.

Hello,

Sorry, but provided link doesn't contain "ARI Ext Menu" module.

Well, I installed the module, enabled it, set it to "top menu" and all other instructions. It is active in my back-end admin site... what could i have done wrong?

Hi,  
I'm having the same problem, in that I installed the module, applied it to the 'top' menu, and set up my menu as per normal, yet the dropdown is not working. Bearing in mind that I am new to Joomla.  
Is this module supported for Joomla 1.6?  
Thanks.

Hello,

Provide link to page, please, where we can see this issue.

PS: Currently the module doesn't support Joomla! 1.6.

This is my link: [www.huacommunications.com](http://www.huacommunications.com).

I should have dropdown menu from the topmenu: "Our Services"

Assign the module to appropriate module position. Available module position can be viewed by this link.
