Custom Height Vertical Menu
Posted by LeonZ - 2011/01/21 12:57

_____

Hi, first I have to say I am very happy with your menu module. Finally something which works out of the box.
Now I just need the finishing touch. I want to change the height of the menu-items and I can't find the place where to change it.
I have an horizontal menu which works fine (exept for the location of the arrow but that is another question)and I have a vertical menu and that is the one which I want to change the height for.

TIA
Leon
