
width and height

Posted by michasdh - 2011/01/25 12:23

Hello,

I like your menu! But I have a problem with the width and height. Auto width is on "YES" and I tried many other options. I set vertical menu direction. the submenu also doesn't work. Here the link:

<http://www.sportgenossen.de/spog/>

thanks for your help!
Micha

Hello,

This is a conflict with site template styles. Try to use the following CSS rules that avoid this problem:

```
.mx-BlockContent-body .ux-menu-container ul li
{
  float: left;
  z-index: 10;
}
```

```
div.mx-contentLayout .mx-content
{
  z-index: 1;
}
```

```
div.mx-contentLayout .mx-sidebar1
{
  overflow: visible;
}
```

Regards,
ARI Soft

thanks for the reply. now the submenu works, but behind other modules. another problem is the gap between the items. it would be so great for posting a solution for the problems. I have no clue about that. Thanks a lot!!!!

Use the next CSS rules:

DIV.ux-menu-container UL.ux-menu LI

```
{  
  margin: 0;  
}
```

```
DIV.mx-contentLayout .mx-sidebar1  
{  
  z-index: 10;  
}
```
