massive gap between sub item levels

Posted by madelharri - 2011/01/25 16:43

_____

Hi, I've just downloaded the ARI Ext Menu and have set it up on a development site on my computer. I have a problem with the submenus. They are very far apart, so it is impossible to move the cursor from one to the other without them disappearing and in a 3 level menu the final level disappears off the page to the right.
Also the top item on one of the submenus disappears behind the menu at the top. I'm attaching a screen grab as I can't send a link given that it is not online. I'm using JAPurity as my template and have not altered the CSS in the ARI Ext file at all and the values in the module are all set to the default.
Please can you help me solve this?
Thanks http://www.ari-soft.com/images/fbfiles/files/Doc5.doc

Hello,

Sorry, but screenshot can't help to investigate this problem. If you can't provide link to page where we can see the problem, send page files that we will try to help. How to do it you can read in this post.

Regards,
ARI Soft

_____

Hi
Thanks for the speedy response. Here is the page file.
