
Sub-Menu's not wanting to disappear

Posted by nurquhart - 2011/01/26 17:10

Hi guys, I took a long search through the forum before I made this thread, but couldn't find any solution to my current problem.

I can't seem to make the sub menu's disappear. I've tried everything I could, but still no luck. Here's the site so you can see my problem... <http://borealwest.dev.kcdc.ca>

Hello,

This is a conflict with site template CSS styles. Open /templates/borealwest/css/style.css file, find the following code:

```
#hornav ul li ul { left: -999em; margin-top: 35px; margin-left: 0px; top: 36px; left: 0; display: block; height: auto; width: 200px; position: absolute; z-index: 99; left: -999em; background-color: #D3D3D3; clear: left; margin-top: 0px; margin-left: 0px; }
```

and replace it with:

```
#hornav ul li ul { left: -999em; margin-top: 35px; margin-left: 0px; top: 36px; left: 0; height: auto; width: 200px; position: absolute; z-index: 99; left: -999em; background-color: #D3D3D3; clear: left; margin-top: 0px; margin-left: 0px; }
```

Regards,
ARI Soft
