
text-align problems

Posted by wertoman - 2011/01/27 20:29

Hello!

Sorry that you care about, but I don't fix this problem.

Text in submenu first align to the center, but after quickly align to the left.

See the video, please help.

<http://www.ari-soft.com/images/fbfiles/files/Untitrprorrtr.zip>

thank in advance!

p.s.Sorry for my English :)

Try to add the following CSS rule:

```
.ux-menu-container .ux-menu A
{
    text-align: left !important;
}
```

Regards,

ARI Soft

very thanks you, this very simple :)

I have one more question: how I can edit color only on one of block, for example, last block of menu?

Each container of menu item contains the following CSS class "ux-menu-item" where is ID of menu item which can be found in Joomla! menu manager. If you want to change color and background of the last menu item, use the following CSS rules:

```
ul.ux-menu li.ux-menu-item21 a
{
    background: none blue;
    color: red;
}
```

Regards,
ARI Soft
