
IE6 - horizontal menu displayed vertically

Posted by Chronos - 2011/01/29 22:13

Hello,

first of all thank you for great menu! It works very well except for Internet Explorer 6 which is unfotunately still used by 10% of our site visitors.

I found several issues with IE6 in the forum but non was applicable to my problem:
The top menu items are in IE6 aligned vertically instead of horizontally. The dropdowns are displayed correctly. Please see the screenshot. Website address: www.skijilemnice.cz

Thank you in advance for any suggestion what could be causing this problem.

Marek

Hello,

Try to add the following CSS rule:

```
#pillmenu UL.ux-menu LI A
{
  _zoom: 1;
  _display: inline;
}
```

Regards,
ARI Soft

Thank you for super-fast answer, the code worked! Menu is now horizontal, but the menu items are not having same width in IE6. It is not a big problem, but if you know how to fix it, it would be nice to have it aligned.

Thank you very much for great support!

It seems this is a problem with site template styles. We can recommend to use IEDevToolbar that investigate CSS styles of the menu and site template.
