
Is there any documentation?????

Posted by crood58 - 2011/02/01 20:38

Hey Folks!

I just downloaded ext menu and plan on using it for a vertical and horizontal menus. I was wondering if there is any documentation for this module. I am pretty much looking for the classes for css to style the menu the way I want it.

Thanks,

Chris

Hello,

Menu has the following structure:

...

-

... sub-menu items goes here ...

...

-

...

-

...

...

Hovered menu item has "ux-menu-link-hover" CSS class.

PS: If you use FireFox browser, you can investigate menu structure with help FireBug addon.

Regards,
ARI Soft
