## CSS questions

Posted by skips3444 - 2011/02/07 21:09

---

I am trying to edit the "menu.min.css" and the "menu.css" in the directory to change the menu font color. Nothing I do seem to work. I also cannot figure out how to align the menu items to "center" Any suggestions? Am I not editing the correct files?

Example: <http://seo-norfolk.net/ibsp/>

Hello,

You can use the following CSS rule:

```
.ux-menu-container .ux-menu a,
.ux-menu-container .ux-menu a:link
{
    color: red;
}
```

Add this code to "CSS Styles" parameter in module settings or to site template CSS file.

Thank you. That was easy. Now, one more thing, how do I get the menu to "center"?

When I follow this link I can only see the middle-right part of the answer. There is no way to scroll left-right to read the full response. How do read this response?

Use this CSS rules:

```
.ux-menu-container
{
    text-align: center;
}

.ux-menu
{
    display: inline-block;
    *zoom: 1;
    *display: inline;
}
```
