
ARI ext menu problem with IE7

Posted by benito - 2011/02/08 10:59

Hi, I have installed ARI ext menu, it works fine with all browsers except with IE7 where the submenu links go under the other modules on the page. i have attcahed a print screen of the trouble on IE7.

here is also the url of the swebsite: <http://www.omlesite.fr>
could you please help me how to solve this problem.
Thanks a lot in advance

Hello,

This problem with site template styles. Add the following CSS rule that fix it:

```
DIV#rt-navigation
{
  position: relative;
  z-index: 10;
}
```

```
DIV#rt-subnavigation
{
  position: relative;
  z-index: 1;
}
```

Regards,
ARI Soft
