
Submenu Container Width

Posted by dasfexel - 2011/02/08 15:19

Hi there,

i'll try to figure out, if it's possible to create a submenu like on <http://www.porsche-design.com/germany/de/> but i can't get it done..

i just want the "submenu-container-background" over the full width of the parent menu..

maybe you can help me with it.

sunny regards

Hello,

Sorry, but the menu can't work in this way.

Hi,
thanks so far, i had an awful feeling this might happen.. Do you know a menu module what solve my problem ? i would pay for such a module...
regards

ok.. hmm.. i there examined every single menu module already..

so i'll to try it on myself i guess..

thanks a lot
