
Menu Images

Posted by ginkod - 2011/02/08 15:57

Is there a way to add menu images to the menu? When you select a menu Image from the menus "Parameters(basic)" It does not show up on the menu. Is there a way around that?

thanks.

Hello,

This is required to modify the module.

Menu template file is located by the next path:

`\modules\mod_ariextmenu\mod_ariextmenu\templates\menu.html.php`

Extra menu item parameters can be got from '\$menuParams' variable (see line #47).

Sorry to bother you. Do you know what that parameter is?

i see `$link = $menuitem->link;`

what would the image param be?

It is stored in "\$menuParams" variable. Use the following code that get menu image:

```
$menulcon = $menuParams->get('menu_image');
```
