
Vertical Menu Doesn't Expand

Posted by tripp - 2011/02/09 16:37

My vertical menu doesn't do anything. It's showing the level menu items but when you hover, the only thing that happens is the color of that item changes. What am I doing wrong? Is it a problem with my "sidebar" not being wide enough or should it expand over into the content section automatically?
Thanks for any help that you can provide.

Hello,

We suppose this problem with site template styles. Provide link to page where we can see this issue that we can investigate this problem.

Thanks for the quick response! Note that I have a horizontal menu already. Can it be that they are conflicting?

Add the next CSS rules to "CSS Styles" parameter in module settings or to site template CSS file:

```
.art-blockcontent-body .ux-menu-container ul li
{
  overflow: visible;
  padding: 0;
  background-image: none;
}
```

Great! Almost there! It's expanding out, but is behind the text in the content. I changed the z-index in the module settings but that didn't do anything for me.

Add the next CSS rule:

```
DIV.art-sidebar1 DIV.art-block
{
  z-index: 1;
}
```

I just tested the menu in IE and its still showing itself being behind the content text. Why wouldn't the z-index code not fix this too?

Posted by admin - 2011/02/09 18:16

Try the following CSS rule:

```
DIV.art-sidebar1
{
  position: relative;
  z-index: 10;
}
```

http://www.orangeburg.sc.us/index.php?option=com_content&view=article&id=63&Itemid=167

It's still doing it.

This is the code that is in my css module field:

```
.art-blockcontent-body .ux-menu-container ul li
{
  overflow: visible;
  padding: 0;
}
```

```
background-image: none;
}
DIV.art-sidebar1 DIV.art-block
{
  z-index: 1;
}
DIV.art-sidebar1
{
  position: relative;
  z-index: 10;
}
```

Try this please:

```
.art-content-layout .art-sidebar1
{
  position: relative;
  z-index: 10;
}
```

It works, thanks.

Why did it take that code for IE to show correctly?

=====

Re:Vertical Menu Doesn't Expand

Posted by admin - 2011/02/09 19:35

It happened because HTML element with CSS class "art-sidebar1" has the next CSS property:

display: table-cell

and IE browser interprets it as element.
