
font-weight the visited link

Posted by jedi1956 - 2011/02/11 12:17

Hello,
sorry for my bad english.
Your Menu Modul is great !!
I search in the forum and found this:

```
UL#{$id} A:hover,  
UL#{$id} A:focus,  
UL#{$id} A.ux-menu-link-hover  
{  
    font-weight: bold !important;  
}
```

this works great, but only the visited link won't be bold. i can make it white, but not bold.
i write this:

```
div.moduletable_service .ux-menu a.current {  
    border-color:#d2e3f4;  
    text-decoration: none;  
    background: #fff url() repeat;  
    font-weight: bold;  
    outline:0;  
}
```

but it was overridden from the arie.html.

How can i fix it?!

see here: www.terra-mater.de/web/service.html

Hello,

Try the following CSS rule:

```
#ja-col1 a.current  
{  
    font-weight: bold !important;  
}
```

Regards,
ARI Soft
