problem with horizontal sub menu
Posted by classic - 2011/02/15 16:22

_____

Hi,
I'm having a height issue with the horizontal menu. It seems that I have to have the menu at a set height for the sub menus to show up. The problem with that is then I run into z-index problems with getting to other links.

You'll notice my problem here :
http://www.shoppartyworld.com/index.php?option=com_idoblog&view=idoblog&Itemid=184

Is there any way to get the sub menus to work without having to have a set height?

Thanks!

_____

Hello,

Could you provide screenshot where we can see what problem you mean and specify what browser you use?

Regards,
ARI Soft

_____

As soon as I hit submit I realized the screen shot I took doesn't show the issue.

So you'll see the drop down goes over my side links, therefore rendering my side links unclickable. http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_02_15_at_11-8640d96d05caa018923c25b2095ab746.png

_____

Use the following CSS rules:

DIV#gk-header,
DIV#gk-header DIV.moduletable_content
{
 overflow: visible;
}

DIV.ux-menu-container
{
 height: auto;
}

Awesome! That fixed my z-index problem, but now I have another one. The text is overflowing. I've attached a screen cap. http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_02_15_at_11-4ecee6226b5bc3519622b9616138f8d6.png

_____

As I suspected, it's a Mac issue. Is there a separate style to access the sub menu so I can see if changing the width solves this?

_____

Try to use the next CSS rule:

.ux-menu-container UL.ux-menu-sub LI
{
 white-space: nowrap;
}

If it doesn't help, you can investigate page styles with help FireBug plugin for FireFox browser or with help WebInspector (press "Ctrl + Alt + I" in Safari or "Ctrl + Shift + J" in Chrome).

_____

I have another styling question...the link to Home in the menu is appearing higher than the other links:

Do you guys know how to fix this? http://www.ari-soft.com/images/fbfiles/images/Screen_shot_2011_02_17_at_8.png

_____

Add the next CSS rules:

```
.moduletable_content > div > .ux-menu-container ul li:first-child,
.moduletable_content > .ux-menu-container ul li:first-child
{
 border-top: 1px solid #E7E7E7;
}
```
