Horizontal dropdown sub menu

Posted by jodyanne - 2011/02/15 23:54

_____

Hello,

I have just found through your forum the css code to center my horizontal menu. What I cant find is how to keep the sub menu left aligned as it is now centered also. The code I found is:

.ux-menu-container
{
 text-align: center;
}

.ux-menu
{
 display: inline-block !important;
}

If anyone knows the css on how to left align the dropdown items but keep the parent items centered that would be great.

the URL is www.kaisercraft.com.au/test_site2 to view the menu

thanks in advance
cheers Jody

_____

Hello,

Use the next CSS rule:

.ux-menu-sub li a
{
 text-align: left;
}

Regards,
ARI Soft
