sub menu is long

Posted by julian - 2011/02/18 02:11

_____

Hi everyone
Iam using Joomla 1.6 with beez20 template.
I had problem that the menu was not showing on position 1 , and I followed how to fixe it throught this forum. and it worked.
now Iam having problem with the submenu:
if i enable the autowidth , then the the submenu will be long , and after ichecked with firebug its show 3000 the width.

if i disable the auto width , then the sub menu will be short and divede the word to two lines.

any advise?

by the way if I use the atomic template , then there is no problem.

thanks
Julian

_____

hi again
i figured out how

just add :

#header ul.ux-menu-sub li {
float:none;
text-align:left;
width: 200px;
}
