can\'t hide submenus

Posted by kolona - 2011/02/19 12:19

_____

Hi all,

i have a problem with this module, i installed it horizontally and i faced with the problem, that sub menus are always on top, it never goes hidden.

please advise me what to do to make hide and when the mouse will be over it could appear again.

the website is www.licensing.ge

thank you

_____

Hello,

What browser you use?

_____

Hi,

i did it but i have another problem.

using chrome it opens great but, the whole menu module is right.

and in Internet Explorer the module doesn't work well but it is left.

what can i do, that on both browsers, the module was on the left and worked great?

thank you

giorgi
