## Getting rid of original menue

Posted by ajoliet - 2011/02/24 02:02

---

So, I only want one menu on the screen. I want to have ARI Ext Menu replace my old menu. How can I get rid of the default joomla menu and still have the ARI Ext Menu?

Thank you!

Hello,

Open "Extensions -> Module Manager" on Joomla! backend, choose "mod\_mainmenu" in "- Select Type -" drop-down and disable necessary module:
