
HELP! - Overlapping Menus

Posted by jstong - 2011/02/27 08:48

I'm using this template <http://demo.gavick.com/joomla15/apr2010/index.php>

AriExtMenu goes over the template menu when the template menu drops...

how do I fix this? so you can see the template menu, and not go behind ariextmenu?

thanks

Hello,

Provide link to page where we can see the problem.

Regards,
ARI Soft

please go to...

<http://bit.ly/hU5c6n>

+
if i wanted to change the look of the menu which file do i edit and where can i find it?

+
is there any way to control the width of the menu so it aligns with website.

Add the following CSS rules:

```
DIV#gk-nav
{
  z-index: 10;
}
```

```
DIV#banner1
{
  position: relative;
  z-index: 1;
}
```

About menu CSS file read here please.

Regards,
ARI Soft
