
Overriding CSS

Posted by iChris83 - 2011/02/27 15:38

Hello everybody,

i have a question about the overriding for the css "menu.min.css". I don't know what to change the original css, but i don't know how i can override this document by my own template.

How must the document be, to do this.

- templates
-- name of own template
--- html
---- mod_ariextmenu ????

Joomla! Version: 1.5.22
AriExtMenu Version: 1.2.4 (Feb 2011)

Thanks,
Regards Chris

Joomla! provides ability to override HTML template, not CSS or javascript files. You can place specific CSS rules for menu into site template CSS file.
