
Color of Submenu 2nd/3rd level.

Posted by Vimes - 2011/03/01 18:34

Hello!

First of all i would like to thank Ari Soft for a great menu extension to joomla.

Im having a problem with the submenus not having the same color as the topmenu item.

"topmenu"thttp://www.thailandresort.se/newtemplate/sv

If you check the second menu item, called "hyra boende" then you see the that the submenus get a blue color instead of the desired Green one im using on the top level (#7a983e).

Ive been looking in the .CSS files but cant seem to rectify this.

This is my CSS styles im currently using for Ari Ext menu :

```
body #nav
{
width: 962px;
}

.ux-menu-container .ux-menu A
{
background: #7a983e none;
color: #fff;
text-align: center;
}

body .ux-menu-container

.ux-menu a:hover{
color: #fff;
}

.ux-menu a:visited{
color: #fff;
}

.ux-menu a:visited{
color: #fff;
}

.ux-menu LI.ux-menu-item55
{
width: 102px;
}

.ux-menu-container .ux-menu li a
{
border-style: none;
}

.ux-menu .ux-menu-sub .ux-menu-sub
{
margin: -1px 0 0 -2px;
}

#nav .ux-menu li ul ul
{
margin: 0;
}

.ux-menu-container .ux-menu-sub LI A
```

```
{
  color: red;
  background: green none;
}
```

///

Any help with this would be greatly appreciated since im pulling my hair out of this, and i cant find the origin of the blue color on the submenus.
