
Child menus hidden by slideshow

Posted by janeinpa - 2011/03/01 20:18

See: http://www.sdst.org/index.php?option=com_content&view=category&layout=blog&id=140&Itemid=173

The first time you try the menu items on the left-vertical menu they are fine. After that, they become hidden by the slide show. I know it's a matter of changing the z-index somewhere, but I'm not sure where or what file. Can you help me please?

Hello,

Add the next CSS rule:

```
DIV#leftcol
{
  position: relative;
  z-index: 10;
}
```

Regards,
ARI Soft

I'm having this same problem. I tried the solution suggested (though I set the ID to the ID of the DIV containing my horizontal menu). This did not help at all, the menus show, but fade when the slider fades to the next picture (in FF, IE and Chrome). I've tried playing around with the z-index in different places with no luck. Thanks in advance for any help.

My site is @ <http://grace.john-m-moore.com>

Hello,

Add the next CSS rules:

```
DIV#main-content
{
  position: relative;
  z-index: 1;
}
```

}

DIV#navr
{
position: relative;
z-index: 10;
}

Regards,
ARI Soft
