trouble with the simplest of changes

Posted by ramaolson - 2011/03/03 01:15
_____

I'm having trouble with the simplest of changes. The site I'm working on is www.music.mackabeez.com

I was able to change the width of the menu by adding: .ux-menu li {width:170px;}

But I can't figure out how to change any font colors. I tried: .ux-menu a {color: #000;} and a host of other variations but nothing changed.

Also the last link 'contact' is a different color for some reason... ???

I really like the basic functionality but if I can't figure out how to customize it then I can't use it.

Any one have any ideas of what I'm missing or doing wrong?

Thanks!

_____

Hello,

Use the next CSS rule:

UL.ux-menu LI a,
UL.ux-menu LI a:link
{
 color: red;
}

Regards,
ARI Soft
