Width of sub menu
Posted by ltempest - 2011/03/03 13:14

_____

Help!

How do I change the width of the drop down sub menus they currently are the same width as the parent item. How do I set them to an auto width? my url is:

http://www.bridgesdementiadaycentre.co.uk/index.php

Thanks

Lee

_____

Set "Auto width" parameter in module settings to "Yes".

_____

I've set it to Yes and the sub menus are now different widths but still not wide enough for the options to appear on a single line.

Any other suggestions?

_____

See screenshot below, all menu items on a single line:
