
Ext Menu

Posted by jonathanykim - 2011/03/05 18:17

after install Ext Menu Module, my menu changed as below

From

menu1
menu2
menu3 with submenu
menu4

To

menu1 menu3 with submenu
menu2
menu4

How would i fix this ?
Any help will be appreciated

Hello,

Is it possible to provide temporary access to your Joomla! backend by email that we can investigate this issue?

We can't help without investigating the issue because we can't reproduce this problem on our test server.
