## Menu width

Posted by Iraslak - 2011/03/07 13:31

---

Hi. I have troubles to make my horizontal menu to fit into it's place. I have searched many width topics already but they did not help.

The site is [http://huhtinie.asiakkaat.sigmatic.fi/joomla\\_fin/](http://huhtinie.asiakkaat.sigmatic.fi/joomla_fin/)

It's full width has to be 900px (the blue part). I've tried to change many things but nothing seems to help.

Hello,

It is possible to center menu and set background of menu container element. Is it suitable?

Regards,  
ARI Soft
