
Error : no method tipTip

Posted by Antonino Migliore - 2011/03/07 14:46

Hi, I was analysing the home page code with the chrome inspector tool and I found the following error :

Uncaught TypeError: Object # has no method 'tipTip'

This is the code where happen the error:

```
jQuery(document).ready(function() {  
    jQuery('#artimenu_106 ul li a img').tipTip({maxWidth:"auto", fadeOut: 7000 });  
});
```

I think it could be a classic conflit error but I dont' know how solve it.

<http://www.finavalholding.com/site/index.php>

If you need the back-end access...you already have user and password.

thanks http://www.ari-soft.com/images/fbfiles/images/ARI_Ext_Menu.jpg

UPDATED

=> It was a conflit between ARI Sexy Lightbox and islider but chrome, as you can see, reported a problem in artimenu. I disabled the ARI Sexy Lightbox from the pages where it is not used. I think it's a work around...I will open a topic in the sexy lightbox category.

Thanks

=====

Hello,

This problem with islider extension. It can't work when several instances of jQuery javascript library are loaded.

Regards,
ARI Soft
