## Images in first line of horizontal menu, icons

Posted by Seiduna - 2011/06/13 18:10

---

This is my first post, so hello all!

I have already implemented several things just by reading this forum, great support!

Here is site.

I use horizontal menu. I want the main horizontal line to be pictures, so no text (maybe it I could centered text horizontally and vertically...). I did this by referring css to itemNumber.

The rest of menu should be as it is now and I would LOVE to add a small icon in fron of each link in drop down menu.

I managed to get the height and width of first horisontal line, also inserted pictures, but main horizontal line (pictures) is in 'conflict' with other css for drop down menu.

Also, if I click on picture, linking does NOT work, only if I click at top violet colored bar, than linking works.

I am sorry for my bad English, I am not a native English speaker.

Thank you

=====

Hello,

Could you provide screenshot where we can see what do you want to achieve?

Regard,  
ARI Soft

Hello,

Thank you for prompt response!

<http://www.shrani.si/f/p/EQ/1bFXbPNK/ari.jpg>

(I hope I placed image ok)

The test site is available in my first post, but here is url: <http://www.papilot.si/joomla/>

Instead og words, I'd like images in top horizontal menu (now there is a 'spiral' image, repeated several times), from there on is business as usual. The only extra thing that I wish are icons in front of links that are dropped down... (I might be pushing for early Christmas here, but still ...)

Thank you.

EDIT: the picture was too big, hope it fits now...

Old version of the module is used on your site. Could you upgrade it to the latest version and after this contact us?

Hello,

aha ok, I upgraded to 2.0.7 (I had 1.9.4(?)).

It is still same :)

Thank you.

---

Use the next CSS rule:

```
#horizontala .ux-menu A.ux-menu-link-level-0
{
    padding: 0;
}
```

```
#horizontala LI.ux-menu-item-main A.ux-menu-link-level-0
{
    background: transparent url(http://www.shrani.si/f/14/Qh/41vTaeMg/menu.png) no-repeat 0 0;
    width: 142px;
    height: 142px;
    line-height: 142px;
}
```

If you want to set specific background image for specific menu item, use the next CSS rule:

```
#horizontala .ux-menu LI.ux-menu-item A.ux-menu-link-level-0
{
    background: transparent url(http://www.shrani.si/f/14/Qh/41vTaeMg/menu.png) no-repeat 0 0;
    width: 142px;
    height: 142px;
    line-height: 142px;
}
```

Where `LI` is ID of menu item. You can find it in Joomla! menu manager. For example if you want to set background image for menu item with ID equals to 3, use the next CSS rule:

```
#horizontala .ux-menu LI.ux-menu-item3 A.ux-menu-link-level-0
{
    background: transparent url(http://www.shrani.si/f/14/Qh/41vTaeMg/menu.png) no-repeat 0 0;
    width: 142px;
    height: 142px;
    line-height: 142px;
}
```

.... WOW ... WOW ...

... ..

I am speechless guys....

I do not know how to thank you... To give me the actual code, with my id-s... wow

This is superb support forum

ok, enough sugar, kheh, I would like to top it with cherry,  
Can I and how can I add icons in front of every menu link in dropdown?

But first I'll go over to Joomla site to recommend you guys...

Thank you again so much.

---

<http://www.shrani.si/f/1i/GW/4IzYIPxf/icons.png>

In front of every link there should be an icon (red dots on picture),  
and of course not in top level menu, where pictures are...

Thank you

---

Use the next CSS rule:

```
#horizontala .ux-menu-sub A
{
    background-image: url(http://www.papilot.si/joomla/modules/mod_ariextmenu/mod_ariextmenu/js/css/images/menu-
    arrow-down.png);
    background-repeat: no-repeat;
```

---

```
background-position: left center  
}
```

Regards,  
ARI Soft

Ari, thank you very much!  
The support here is really spectacular!

Thank you.
