
width of menu bar

Posted by somsom - 2012/11/18 10:03

hi,
How can I change the width of the horizontal menu bar
i hope that will be 950px

Hello,

You can set width of each menu item. If you want to set the same width for all main menu items, add the following code to "CSS Styles" parameter in module settings:

```
#{ $id } LI.ux-menu-item-level-0
{
  width: 100px;
}
```

If you want to set width for specific menu item, use the following code:

```
#{ $id } LI.ux-menu-itemMENU_ITEM_ID
{
  width: 150px;
}
```

Where MENU_ITEM_ID is ID of menu item. For example if you want to change width for menu item with ID = 73, use the following code:

```
UL#{ $id } LI.ux-menu-item73
{
  width: 150px;
}
```

Is it the same deal for changing the length in a horizontal menu? (length: 300px;)?

What about drop down menu items? How do I change the width of those. This isn't working for drop downs.

Hello,

Provide a link to a page with the menu and specify what custom CSS rules you use and what exactly doesn't work.

Hello,

Trying to use:

```
UL#{$id} LI.ux-menu-item100
{
width: 200px;
}
```

Website. The main menu, under events calendar, the creative access art center calendar menu item is the one I wish to extend the width.

Hello,

Use the following CSS rule:

```
UL#{$id} LI.ux-menu-item100
{
width: 200px !important;
}
```
