
Centering the menu on the page

Posted by trooper - 2013/02/06 23:48

Hi.

Yes, yet another thread asking how to do this. Sorry!

I've searched and found lots of posts asking for the same thing, and I've tried lots of suggestions made to other people but none of them have worked for me. I don't understand css enough to be able to work out a solution for our site so I'm hoping you good people can help!

The site's at <http://www.cakepopcorner.co.uk> , and we'd like both menus centred on the page.

Many thanks in advance!

Hello,

Use the following CSS rules:

```
BODY DIV.ux-menu-container
{
    text-align: center;
}
```

```
BODY .ux-menu-container .ux-menu-horizontal
{
    display: inline-block;
}
```

Regards,
ARI Soft

What file do we add this code to?

-Update, sorry I'm an idiot and didn't realize you meant within the module options. Worked like a charm, thanks so much for this great module!

hi i have the same problem.
the site is:

<http://villa.agnanti-apartments.com/>

thanks

Hello,

Use the code from this post.

Regards,
ARI Soft
