text color

Posted by carbonathus - 2010/04/08 15:33

_____

Hello,

Congratulations for this module ! particulary for the feature a:current very usefull

I would like change the class for the menu text color (a:link, a:visited) which is actually this of my template (typography.css).

I don't find where change that for have a particular color to my ARI Ext menu text...

Thanks

BT

_____

Hello,

You can add the following CSS rules to your template CSS file:

```
.ux-menu a:hover{
  color: red;
}

.ux-menu a:visited{
  color: green;
}
```

Regards,
ARI Soft

_____

Perfect !!!!

I only had to change the order which you gave me : first a:visited and after a:hover :silly:

And finally, all the .ux-menu are now in my template CSS, Like that, I can easily modify them directly in backend.

Fabulous

Greetings

BT
