
General CSS Styling for ARI Ext?

Posted by chiefbobo - 2010/04/15 18:58

Man this is so close to what I need, thanks!

I'm seeing some threads about specific styling for ARI Ext, but where can I modify things like the top padding and change the background of the menu. There doesn't seem to be a dedicated CSS file for the module.

Everything I've seen in the forum seems to be adding CSS code the the template CSS file. Where are the default styles hidden? Any help would be appreciated.

AH! Found it. It's in the js folder (javascript?) inside the mod_ariextment folder.

Hello,

Yes, you can find CSS file by the following path:

/modules/mod_ariextmenu/mod_ariextmenu/js/css/menu.min.css

I wanted to see if you could help me. I would love to change the background when you hover over a menu item. Also, I wanted to know if the menu could be centered instead of justified to the left.

Where could I do this? I tried to find the following file in my directory "background:url(images/menu-item-bg-over.png)" which I think would control the background color; but I can't seem to find it anywhere!! I just need the background color to be: #AA30AB and then just have the menu centered and not justified to the left. I am actually using this as a "submenu"

Thanks a lot,

David

Hello,

Sorry for delay, regarding your questions:

1. You can use the following CSS rules to change background of hover items:

```
BODY .ux-menu A:focus,  
BODY .ux-menu A:hover,  
BODY .ux-menu A.ux-menu-link-hover  
{  
    background: #AA30AB none;  
}
```

2. If you provide link where we can see menu on your site, we can help you centering menu.

Regards,
ARI Soft

Hello

I have installed the menu module

How can I make the menu look
like the 3rd on the demo?

Thanks

Hello,

This is demo page for ARI YUI Menu module, not for ARI Ext Menu. Install ARI YUI Menu module if you need this look.

Regards,
ARI Soft
