Remove Bullet

Posted by SHoggard - 2013/03/27 05:25
_____

Hi, great little menu module.

Small problem it is creating a Bullet before each menu item (left) and adding space making the menu over-run the right side of my column.

How do I remove it? http://www.ari-soft.com/images/fbfiles/images/AriMenu_DOT.jpg

_____

Add the following CSS rule to "CSS Styles" parameter in module settings:

.column ul.ux-menu li
{
 padding-left: 0;
 margin-bottom: 0;
}

Regards,
ARI Soft

Hi

We have a similar issue. We have a menu in position-12. It is coming with bullets. We want to remove the bullet. We have put in the code in the css styles but the bullets are still coming.
Please see here a picture of the menu:

_____

Add the following CSS rule:

#main ul.ux-menu
{
 list-style-type: none;
}

Regards,
ARI Soft

_____

I am trying to remove the bullet from the ARI Easy Slider text. According to this entry, entering the following (see below) solved the problem. Unfortunately, it has not solved mine. I have verified the bullet is in the ARI Easy SLider module and not my article. Can you give me any additional suggestions?

#main ul.ux-menu
{
list-style-type: none;
}

_____

We have not rolled these changes out to the public site, but I have looked at the underlying HTML sourced rendered via the browser. Does this help?

One in four children in the United States suffers from a vision problem. iScreen Vision can help identify problems much earlier than traditional vision screening.

Performing a vision screening test with iScreen Vision's pediatric vision screening equipment gives pediatricians an eas and reliable vision test.

Studies have shown photoscreening allows earlier, more accurate, and quicker vision screening than screening with a traditional eye chart.

Vision screening with photoscreening has been endorsed by professional societies including the AAP, AAO and AAPOS in a 2012 policy statement.

The AAP said instrument screening "is especially useful in the preverbal, preliterate, or developmentally delayed child.â€•

_____

It can be a problem with site template styles so we can investigate the problem if you provide a link to a page where we can see it.

PS: Send your order number by email please.

Regards,
ARI Soft

Sorry for the delay getting back to you. We just rolled out the changes to the site.

If you go to
www.iscreenvision.com
you will see in each slider (3 in all) a light gray bullet to the left of the text. These are the bullets we are trying to remove.

_____

Add the following CSS rules to a site template CSS file:

.art-postcontent ul > li.es-news-item
{
 background-image: none;
}

Regards,
ARI Soft
