## Horizontal submenu not displaying

Posted by jlanders - 2013/03/28 19:35

---

I have the menu displaying correctly in horizontal mode. Looks great. However I don't get a submenu dropdown. The little arrow shows indicating submenu's but they do not appear.

Submenu's are enabled. Suggestions?

This site is internal and behind a firewall. For you to view it, I would need to send you a remote session if that is necessary.

Thanks

Hello,

Save files of a page where the problem occurs into a browser and send them by email. You can read how to do it here.

Javascript error which is not related to "ARI Ext Menu" occurs in IE browser, but it prevents execution of "ARI Ext Menu" javascript code. You can see the error in browser's error console (press F12 in IE browser to see it). Fix the error and the menu will work fine.
