## Fit to page width?

Posted by slewis1972 - 2013/04/08 19:41

---

I am currently centering the menu via:

```
BODY DIV.ux-menu-container
```

```
{  
text-align: center;  
}
```

```
BODY .ux-menu-container .ux-menu-horizontal
```

```
{  
display: inline-block;  
}
```

BUT I'd like to instead have the menu fit the width of the page (currently set to 1002px) and the menu items equally fit into the menu length.

Any ideas?

=====

The extension doesn't support this ability. It is possible to set menu items width to specific values. You can read about it [here](#).
