Hi

Trying to add this menu to a new site template I am knocking up:

http://www.hamptonfc.net/backup1/hamptonfc.net/

any ideas?

Thanks

Hello,

We have checked the menu in FireFox browser and it works fine.

Just solved it myself in the last hour or so. JCH Optimize has failed on 2.5.9 where as it worked on 2.5.8. Enabled GoogleAjaxLib and all back working.

Support for a free product is great, will be buying from you.
