
ARI Ext Menu Overlap with Main Menu

Posted by Dav123 - 2013/04/30 15:09

Hello,

On my website, i'm using the Ari Ext Menu and it is overlapping with my main menu. Basically it stays in front of my main menu items. What would be the solution?

My website and the page where it currently is happening is: http://web.cm-pvarzim.pt/rev_apovoadearzim/index.php/indices/indice-de-titulos

I've searched this issue around the forum and tried some of the solutions to similar problems, but i can't seem to fix it.

Looking forward for an answer, Thanks in advance!

Hello,

This problem with site template styles. Add the following CSS rules to fix the problem:

```
#t3-mainnav
{
  z-index: 2;
  position: relative;
}
```

```
.t3-sl-1
{
  z-index: 1;
  position: relative;
}
```

Regards,
ARI Soft

Hello again.

Damn, i'm dumb, such an easy solution.
Thanks for the fast and awesome support.

May be closed, best of luck ARI Soft!!

I tried the code you gave but it didn't work.

Here is the screenshot for my problem:
the dropdown of the main menu goes under the ARI Ext Menu, when it should be in front.

How do I fix this?

Add the following CSS rules:

```
BODY #rt-top-surround {z-index:2;}  
BODY #rt-transition {z-index:1;position:relative;}
```
