2 questions

Posted by Destelloaudiovisual - 2013/05/09 15:36

_____

Hello! I would like to know:

Is there any way to take out Ari Ext Menu from the flow? I mean, my intention is to place the menu over the header, in a specific point.
Can I make Ari Ext Menu transparent?

Thanks!!

_____

Hello,

1. It is necessary to use custom CSS rules and it depends on module position and site template styles.

2. Do you want to do menu transparent or semi-trasparent?

Regards,
ARI Soft

_____

Wow. You guys are superfast.

1. My template is cloudbase 2.5 (gantry) and the position is headera. Which rule and which css file do I have to change?
2. I would like to make it transparent.

Thanks!!!

_____

Provide a link to a page where we can see the menu on your site and describe a new position for the menu.

Regards,
ARI Soft

_____

Add the following CSS rules:

```
.rt-grid-12>.rt-block
{
 overflow: visible;
}

#rt-header .ux-menu-container
{
 position: absolute;
 top: -750px;
 left: 20px;
}

#rt-header .ux-menu A
{
 background: none transparent;
 border-style: none;
}
```

Regards,
ARI Soft
