
Menu not showing in Beez 3 Position-1

Posted by Trefex - 2013/05/26 19:06

Dear Dev Team,

I recently migrated to Joomla 3.1, and am using the Beez3 template.

I installed your module and it works great in all positions except Position-1, where nothing is actually displayed. I also checked in the Chrome debugger, and it seems that the menu is there, but "behind" the content area, so not visible.

I'm sure it's just a positioning problem, but I can't figure out what to do.

You see in the attached screenshot what I mean by "hidden in the content area".

Thank you for your help in this,

Currently, only a localhost version of this site exists. <http://www.ari-soft.com/images/fbfiles/images/Capture-d13cdb34f8f21ff7d2eb90aed0f02707.PNG>

Hello,

We can investigate the problem if you provide a link to a page where we can see it.

Add the following CSS rules:

```
body #header
{
    overflow: visible;
}
#header ul.ux-menu li a:link,
#header ul.ux-menu li a:visited
{
    display: block;
    padding: 10px 14px;
}

#header ul.ux-menu li a.ux-menu-link-parent:link,
#header ul.ux-menu li a.ux-menu-link-parent:visited
{
```

```
display: block;
padding: 10px 24px 10px 14px;
}
```

```
#header .ux-menu ul.ux-menu-hidden
{
display: none;
}
```

```
#header ul.ux-menu
{
right: 0;
top: 0;
margin: 0;
padding: 0;
position: relative;
}
```

```
#header ul.ux-menu-sub li
{
text-align: left;
}
```

```
#header .ux-menu-container ul
{
max-width: none;
padding: 0;
margin: 0;
}
```

Hello,

Custom CSS rules can be added to "CSS Styles" parameter in module settings or to a site template CSS file.

Add the following CSS rule:

```
body #header ul.ux-menu
{
    top: -340px
}
```

Hello,

So far very well everythind worked except the last code wich was supposed to place the Menu over of The Logo.

IÂ´m using joomla 2.5 and the Template is BEEZ_20.
