## Click to roll-down instead of Hover

Posted by Trefex - 2013/05/26 22:29

---

Dear Dev team,

Is it possible at all to make the default behaviour of dropping-down happen on clicking instead of hovering over the menu items?

In that case, it makes it more friendly for mobile platforms such as iPhone etc...

Thank you for your feedback on this,

Kind Regards,

Joomla 3.1

Hello,

The extension works in the described way for mobile devices.

Hey,

In that case, the "clickable" menu should not point to anything right, as I saw that on mobile no page is loaded then.

I guess that makes sense, although it's confusing on the desktop version then?

How do you recommend solving this, having a sub-menu with the same link as the main menu?

Best,

=====
