
ARI EXT Menu, no sub-menu and menu SOLVED

Posted by brzibrzi16 - 2013/05/27 13:52

Hello.
On my web I use Ari Ext Menu but in IE there is no sub-menus and when start "Start Cooliris!" menu is always on top???

Hello,

Specify what IE version you use and provide screenshot(s) where we can see the problem.

Regards,
ARI Soft

Dear admin

I have the site
www.kedka.gr
i m using ari ext menu and i have a problem with IE 10 because the sub menus dont show ...

I have seen the forum but without any luck on my site
Any help would be really appreciated!!

Thank you in advance,
Kyriakos

ok i fixed by installing
Joomla Plugin: Google Ajax Library

very usefull forum..

keep up the good work!!!

thank you...
