
ARI EXT MENU reduce blocks!

Posted by Dav123 - 2013/05/27 15:53

Hello,
If you'd be so kind to help me once again, here goes:
As you can see in the attached screenshot, my menu is occupying two lines, i'd like to reduce the blocks making it so that it only occupies one line.
Oh the link is: http://web.cm-pvarzim.pt/rev_apovoadevarzim/index.php/indices/indice-de-autores

Looking forward for an answer, thanks. :P <http://www.ari-soft.com/images/fbfiles/images/print-540d8052e07fad446d0fbc476611251c.png>

Hello,

Use the following CSS rule:

```
#ariext110 .ux-menu-link-level-0
{
padding-left: 9px;
padding-right: 9px;
}
```

Regards,
ARI Soft

Awesome, done.
As always, amazing and super fast support, even on dumb trivial questions...
Thanks!
