
Ari Menu Sub Categories

Posted by jimswebworx - 2013/06/02 18:08

On my test site <http://jimswebworx.com/joomla2/> I have the ARI Menu floating right as specified. What I would like is for the subcategory text to be left aligned and have a white border only for the subcategories. I have specified for the text to be left aligned but the CSS overrides it.

Hello,

This problem with site template styles for default menu. Add the following CSS rule:

```
#header ul.ux-menu-sub
{
padding: 0;
}
```

Regards,
ARI Soft

Thanks for you fast reply. I implemented the code but do not see any change in my menu.

I have the menu floating right, but I need the sub-category text to be left aligned.

I would also like a border for my submenus 1 px, white.

Try to clean browser's cache. The menu is shown fine for us:

Posted by jimswebworx - 2013/06/02 20:41

I did. Changed the name of "shop" to "test shop". Still right align.

Re:Ari Menu Sub Categories

Posted by admin - 2013/06/02 20:46

```
#header .ux-menu-sub A
{
display: block !important;
float: none;
}
```

That is great. Works perfectly. One last request. I am trying to put a border on these subcategory menu items only, not on the main menu items. I get the border but as you can see from my screenshot image the horizontal border does not go 100% across the subcategory menu item. <http://www.ari-soft.com/images/fbfiles/images/funnyborder.jpg>

Use the following CSS rule to add borders instead of your CSS rule:

```
#header .ux-menu-sub LI
{
border: 0.5px solid #FFF;
}
```

Thank you so very much. Perfect!!!

Re:Ari Menu Sub Categories

Posted by jimswebworx - 2013/06/03 11:15

Is there a way to specify different borders for the sub menu items? I want to turn off left and right borders

```
#header .ux-menu-sub LI
{
border: 0.5px solid #FFF;
border-top-style:solid;
border-right-style:none;
border-bottom-style:solid;
border-left-style:none;
}
```

Send an image where we can see what do you want to achieve.

Regards,
ARI Soft

Re:Ari Menu Sub Categories

Posted by jimswebworx - 2013/06/03 11:47

What I want to do is only remove the borders on the left and right of the sub menu item. I want a white border on the top and bottom of sub menu item only.

Hello,

I have implemented this project into my final site and now I have a new and unusual problem. The problem only exists on my homepage. What is seemingly the same code on all the other pages works perfectly. on my home page the menu displays text left, right and centered within the same menu. I want the text to be left aligned. IN the picture you can see a menu category for products and one of the sub menu items "IP Application Server" aligned properly. But "Phones", "IPEdge", "CIX" align right.

Re:Ari Menu Sub Categories

Posted by jimswebworx - 2013/06/16 16:46

I apologize for the double post. I have resolved the text within a menu all aligning the same way, but I cannot figure to have the actual menu align under the menu name. In my attached screen shot you can see two pages. The one on the left which is my homepage, incorrectly displays the menu item to the left of the parent menu item, then on the right an article page correctly displays then menu below the menu name. Any idea what I am doing wrong here?

Hello,

On what page we can see the problem? The menu works fine on home page.

Regards,
ARI Soft

Re:Ari Menu Sub Categories

Posted by jimswebworx - 2013/06/16 19:13

Problem only occurs on homepage. I think tt started when I did some optimization with the .htaccess file.

Here is what was added:

```
# compress text, html, javascript, css, xml:
AddOutputFilterByType DEFLATE text/plain
AddOutputFilterByType DEFLATE text/html
AddOutputFilterByType DEFLATE text/xml
AddOutputFilterByType DEFLATE text/css
AddOutputFilterByType DEFLATE application/xml
AddOutputFilterByType DEFLATE application/xhtml+xml
```

```
AddOutputFilterByType DEFLATE application/rss+xml
AddOutputFilterByType DEFLATE application/javascript
AddOutputFilterByType DEFLATE application/x-javascript
```

Or, compress certain file types by extension:

```
SetOutputFilter DEFLATE
```

```
##### Begin Enable Caching #####
#
# enable expirations
ExpiresActive On
# expire images after a month in the website visitor cache
ExpiresByType image/gif "access plus 1 month"
ExpiresByType image/png "access plus 1 month"
ExpiresByType image/jpeg "access plus 1 month"
ExpiresByType image/x-icon "access plus 1 month"
# expire stylesheets and javascript after 1 week in the website visitor cache
ExpiresByType text/css "access plus 1 week"
ExpiresByType application/javascript "access plus 1 week"
# expire flash and XML 1 month and 1 week respectively in the website visitor cache
ExpiresByType application/x-shockwave-flash "access plus 1 month"
ExpiresByType text/xml "access plus 1 week"
#
##### End Enable Caching ###
```

Do you see the issue in a firefox browser? I get the issue on both PC and Mac versions. Oddly enough I can get it to work fine in IE8, but not in any of the newer browsers.

Re:Ari Menu Sub Categories

Posted by admin - 2013/06/16 20:00

It works fine in FireFox for us.

Regards,
ARI Soft
